

PR Allred Score (Breast)

Organization	Field Name	ID	Required
KCR	Progesterone Receptor Total Allred Score	34110	yes
SEER	PR Allred Score	3916	yes

Note 1 Physician statement of PR (Progesterone Receptor) Total Allred Score can be used to code this data item.

Note 2 Code this data item using the same report used to record Progesterone Receptor Summary (NAACCR Data Item #3915).

Note 3 The Allred system looks at what percentage of cells test positive for hormone receptors, along with how well the receptors show up after staining (this is called "intensity"). This information is then combined to score the sample on a scale from 0 to 8. The higher the score, the more receptors were found and the easier they were to see in the sample.

- The registrar should not calculate the Allred Score unless both components are available (proportion score and intensity)
- See the ***Allred Score for Estrogen and Progesterone Receptor Evaluation*** section in the SSDI manual for assistance in determining the Allred Score

Note 4 If PR test is performed, but Allred score is not documented, or cannot be calculated, code X9.

Code	Description
00	Total PR Allred score of 0
01	Total PR Allred score of 1
02	Total PR Allred score of 2
03	Total PR Allred score of 3
04	Total PR Allred score of 4
05	Total PR Allred score of 5
06	Total PR Allred score of 6
07	Total PR Allred score of 7
08	Total PR Allred score of 8
X8	Not applicable: Information not collected for this case (If this item is required by your standard setter, use of code X8 will result in an edit error.)
X9	Not documented in medical record PR (Progesterone Receptor) Total Allred Score not assessed, or unknown if assessed
